REMINDER FROM IT SUPPORT

_____

Reminder: Keep Your Windows Computers Updated and Stay Alert

As we continue to strengthen our cybersecurity, it's important that everyone keeps their Windows computers up to date with the latest patches and updates. These updates help protect us from new threats and improve system performance.

If you experience any issues with updates or notice anything unusual, please don't hesitate to reach out to the IT team for support.

Additionally, there's a growing concern worldwide about botnets—networks of infected computers controlled by attackers. To help prevent this, regularly check your CPU usage and watch for signs like your computer getting unusually hot or running slower than normal. If you notice anything suspicious, report it immediately.

By staying vigilant and keeping systems updated, we can all help protect our organization from cyber threats.

Key factors:

- Remember to update windows
- Contact IT if:
    - Computer tends to get hot fast
    - Computer is loud
    - More CPU usage than usual
